BOOK SYNOPSIS

Professor Bloomer peels away the frills of our modern educational system and presents a set of straightforward teaching methods in his new book, Professor Bloomer's No-Nonsense Spelling Program. These methods include learning both factual knowledge and the mental processing skills necessary for success. If you're a parent, teacher, or other concerned adult responsible for the education of a child, Professor Bloomer's book will help you teach a young learner how to learn, making future learning easier and more efficient. This no-nonsense program will not only help your child become a better speller: • It will enhance the child's basic reading skills. • It will help the child increase his memory. • It will enhance the child's sequencing skills—the skills of ordering ideas and things, essential for organizing thoughts and solving problems. Reading, writing, spelling, and learning problems have been Dr. Bloomer's focus for over half a century. He successfully applies scientific neuropsychological principles to help youngsters learn to read and spell, and he's developed prescriptive treatments for those with unique learning and attention problems—techniques he shares in this easy-to-follow guide to help children succeed both in school and in life.

PROFESSOR BLOOMERS NO-NONSENSE SPELLING PROGRAM LEARNING HOW TO LEARN INCREASING MEMORY AND SEQUENCING THROUGH SPELLING
